choices

memenetes
@memenetes
Me choosing the right tool for the job
boring tech that always works
Tools that have been battle-tested in production
projects with zero docs but written in golang, never seen prod but can do EVERYTHING, shiny af

wrong is ok

memenetes
@memenetes
"Why did your company start using Kubernetes?"
Me:
CTO presenting k8s as the solution to zero downtime for website
Excited customers
Engineering team knowing that the solution is making things harder and more expensive
